

Parental or Guardian Consent to Treat a Minor

A MINOR is anyone under the age of 18 years. All treatment of minors requires parental consent as consented.

MINORS: For people under the age of 18 years old, by providing your parent or guardian contact information, it is presumed that the parent or guardian will be virtually available during the session. While the child is in session, a parent/guardian needs to be virtually available via text, phone, or video.

If a parent or guardian is not available for any session, please call to cancel the appointment at least 48 hours in advance to avoid a missed session fee.

This consent form is to confirm your agreement for the minor patient to receive care services via based on the condition as described above.

As the parent or legal guardian of the minor receiving services, I understand the nature of these services, and I agree to my child participating in sessions.

Voluntary Participation: Participation in consultations and treatment is entirely voluntary and can be discontinued at any time.

Parents/ Guardian have the right to withhold or withdraw consent, or to stop participating in mental health care, at any time.

Emergency Procedures: In case of an emergency, parents/guardian should contact emergency services immediately. The Televero Health care provider will have a protocol for managing emergencies during sessions.
