

How to connect browser audio to Medwriter when on the remote desktop and/or using headphones

This guide provides a straightforward process for integrating audio from your browser, such as a Zoom session or Doximity session, when using Medwriter. Following these steps, users can capture patient audio in Medwriter and can utilize the Medwriter-generated output. This process should be followed when in the remote desktop and/or when using headphones during your patient session.

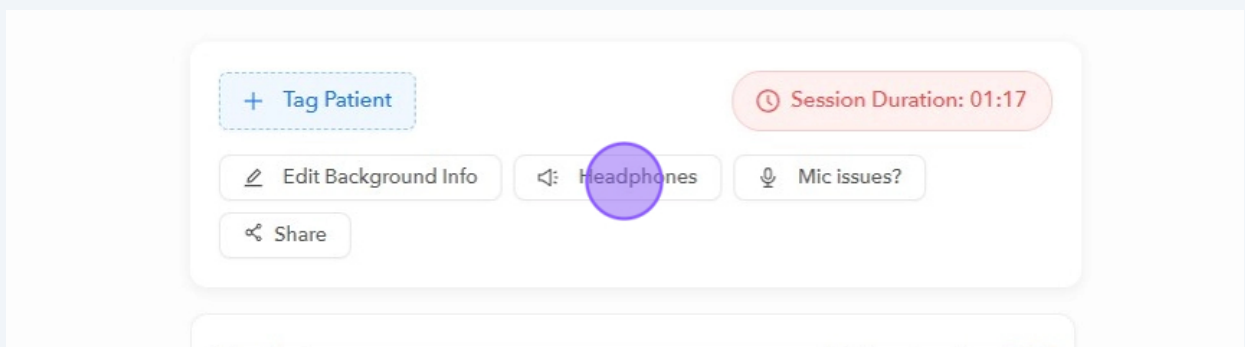

1 Click the camera for the patients' appt to join Zoom session

4 Navigate to <https://app.medwriter.ai/> and Click "Start Session"

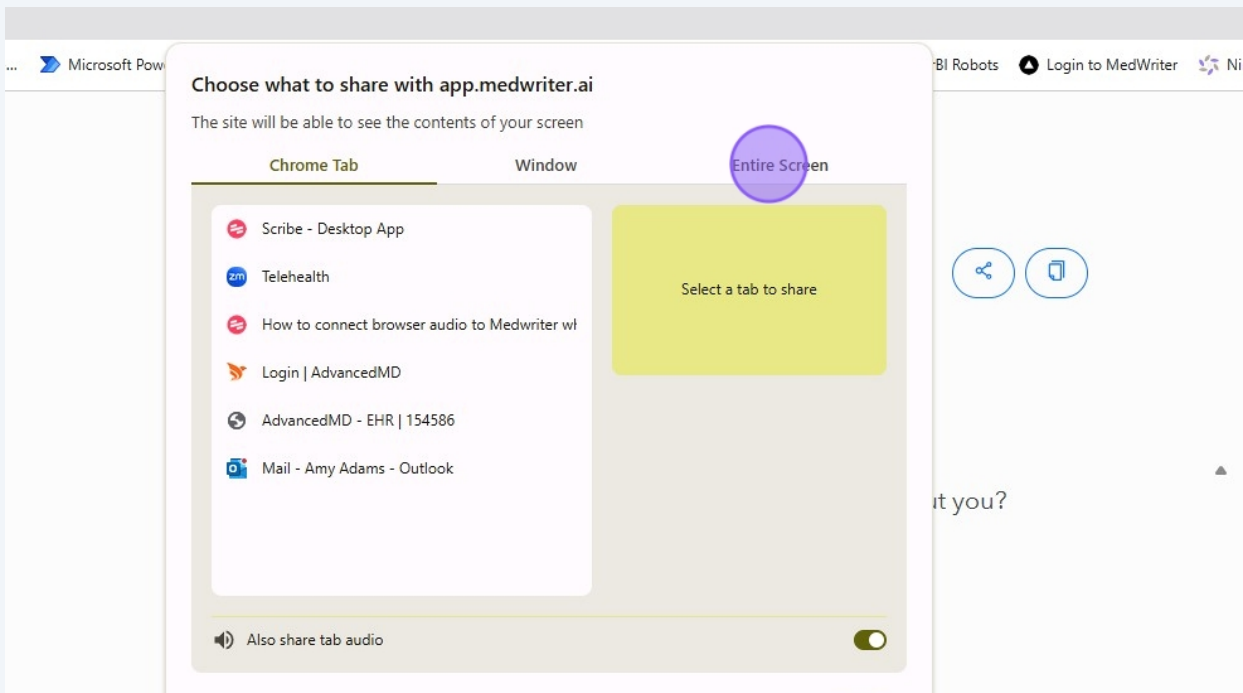

5 Click "Headphone Audio" or "Headphones"

6 Click "Next"

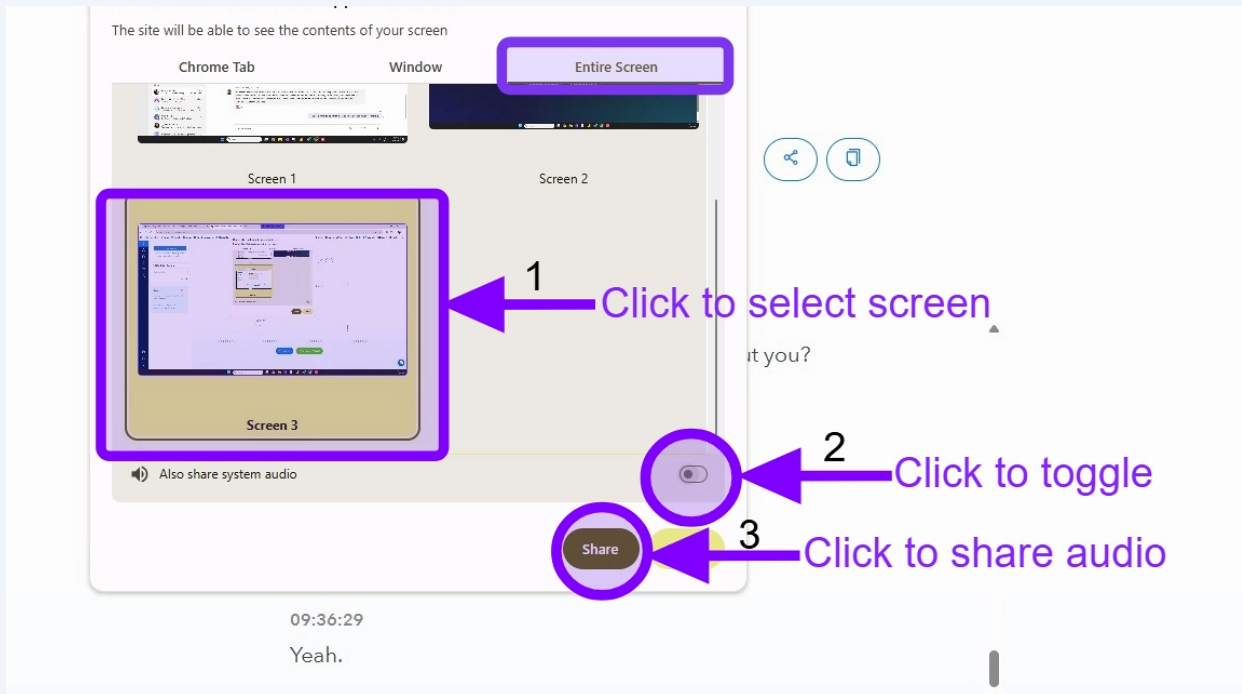

7 Click the "Entire Screen" tab.

8 Step 1: Click the screen that you will be holding your session on.

Step 2: Click the "Also share system audio" toggle to allow system audio sharing.

Step 3: Click "Share"

9 You will see a bar at the bottom of your screen confirming that you are sharing your screen browser audio.
